Hunter Systems Group Releases NIST-Compliant Mugshot Application

Hunter Systems Group's Advanced Biometric Application Provides Law Enforcement Agencies a New Crime-Fighting Tool

Marshfield, MA, (PRWEB) January 12, 2009 -- Hunter Systems Group, Inc., a leading software and consulting company for the public and private safety sectors, today released Hunter Smartshot[TM], a new mugshot software application developed by Hunter Systems Group, Inc. and Quantum Signal, LLC that takes the guesswork out of mugshot capturing while assisting law enforcement personnel in the creation of consistent and enforceable evidence.

Hunter Smartshot[TM] with its advanced biometric capabilities, is a budget-friendly system that constantly tracks the subject on a live screen, framing a perfect shot every time. The system enables law enforcement personnel to meet exacting National Institute of Standards and Technology (NIST) guidelines of both the Federal Bureau of Investigation and the Automated Fingerprint Information Systems.

Mark Thompson, President of Hunter Systems Group, Inc. said "Hunter Smartshot[TM] is the culmination of several months of development with our partners at Quantum Signal, and we believe that this application provides a seamless transition for the booking process to move from the initial arrest to the department's record management system."

"We believe that with Hunter Smartshot[TM] we are fulfilling a real need in the police community for reliable and uniform results from often inconsistent mugshot-taking circumstances," said Greg E. Harris, Vice President of Business Development.

Hunter Smartshot[TM] is a complete out-of-the-box flexible application that combines the applicable software, mounting hardware, an in-depth training manual and instructions on taking and managing mugshot photographs. The deluxe package also includes a camera to provide a complete turnkey solution.
